

The image displays 20 technical drawings of reinforced concrete column reinforcement, organized in a 4x5 grid. Each drawing includes a cross-section, a longitudinal section, and a table of reinforcement data.

Row 1: Shows columns with 4 bars. The first drawing includes a detailed cross-section with a star-shaped reinforcement pattern. Tables include bar counts (e.g., 4 bars of 10mm, 16mm, 20mm, 25mm) and diameters.

Row 2: Shows columns with 2 bars. Tables include bar counts (e.g., 2 bars of 10mm, 16mm, 20mm, 25mm) and diameters.

Row 3: Shows columns with 2 bars. Tables include bar counts (e.g., 2 bars of 10mm, 16mm, 20mm, 25mm) and diameters.

Row 4: Shows simplified reinforcement details for columns with height H and diameter D. The drawings are labeled with H and D, and include tables with bar counts (e.g., 2 bars of 10mm, 16mm, 20mm, 25mm) and diameters.

Table 1 (Example):

Diámetro	10	16	20	25
1	4	4	4	4
2	2	2	2	2

Table 2 (Example):

Diámetro	10	16	20	25
1	4	4	4	4
2	2	2	2	2
