## **AUTHOR CORRECTION**

## Correction to: Uniform and scalable sampling of highly configurable systems

Ruben Heradio 1 • David Fernandez-Amoros 1 • José A. Galindo 2 • David Benavides 2 • Don Batory 3

Published online: 14 March 2022 © The Author(s) 2022

Correction to: Empir Software Eng (2022) 27: 44 https://doi.org/10.1007/s10664-021-10102-5

The original version of this article, unfortunately, contained mistakes. The title of Section 2.2.3 should be "Method 3: Measure the distance between the theoretical variable probabilities with the empirical variable frequencies in a sample", and the title of Section 2.2.4 should be "Method 4: A statistical goodness-of-fit test that compares the theoretical variable probabilities with the empirical variable frequencies in a sample".

The original article has been corrected.

The online version of the original article can be found at https://doi.org/10.1007/s10664-021-10102-5
