Test

A couple of elderly people lived in a street facing the sea. Their house was between the house of a fisherman, on the left, and a park, on the right. The park was in a corner. One night when the spouses were not home, two thieves planned to rob their house. One of the thieves, Peter, got into the house, while the other, Javier, waited outside, hidden in a supermarket in front of the house of the elderly couple. While checking the street, Javier received a call from his girlfriend who was very upset because he had forgotten her birthday. Javier was so distracted apologizing to his girlfriend that he did not see that the elderly couple had come back. They entered the house and found the thief, Peter. The old woman grabbed a broom and ran after Peter down the street, turned the corner of the park and ran towards the north until he reached the police station. There, some agents arrested Peter.
